

Echarla Vijay kumar

PYTHON & WEB DEVELOPER

Dedicated and motivated BCA graduate with a strong foundation in Python, web development, and object-oriented programming. Passionate about writing clean, efficient code, database design, and building scalable applications to deliver effective software solutions.

EDUCATION

Bachelor of Computer Applications (BCA)

Sheshadripuram College, Tumakuru

2026 – Present | 6th Semester

CGPA: 8.5 (Graduated)

Board of Intermediate Education

SR Junior College, Guntur

2020 – 2022 | Percentage: 75%

Board of Secondary Education (SSLC)

Kerala Model School, Amaravati

2019 – 2020 | Score / Grade: 10/10 (or 100%)

STRENGTHS

- **Problem Solving:** Logical analysis & algorithmic debugging.
- **Quick Learner:** Adapts to modern tech stacks quickly.
- **Consistency:** Highly disciplined code practices.
- **Collaboration:** Strong teamwork & communication.

HOBBIES & INTERESTS

- Content Creation
- YouTube Vlogging
- Gym Training & Fitness
- Reading Books
- Listening to Music

PERSONAL DETAILS

Date of Birth: 26/10/2005

Languages: English, Kannada, Telugu

Status: Open to Entry-Level Roles

SKILLS

SQL

PYTHON

HTML

CSS

JAVASCRIPT

GIT & GITHUB

VS CODE

PYCHARM

CONTROL LOGIC

DEBUGGING

PERSONAL PROJECTS

Password Generator Application (Python)

Developed a customized Python-based application that creates robust, highly randomized passwords based on dynamic user preferences.

- **Algorithmic Randomization:** Utilized Python's **random** module to produce secure combinations of letters, numbers, and special characters.
- **Dynamic Validation:** Applied the **range()** function and custom validation logic to enforce constraints on password length and structural complexity.
- **Clean Architecture:** Structured modular and readable code, optimizing execution efficiency and error handling.
- **Technologies Used:** Python, VS Code, Git.

Rock Paper Scissors - Console Game (Python)

Engineered an interactive console-based game featuring automated decision logic and real-time user input execution.

- **Game Logic:** Designed computer decision-making mechanisms utilizing pseudo-random state calculations.
- **Control Flow:** Implemented conditional branching, loops, and input sanitization for uninterrupted gameplay.
- **Technologies Used:** Python, PyCharm, Terminal CLI.

CERTIFICATIONS & COURSEWORK

Python & Full-Stack Web Development Coursework

Gained hands-on experience in software development fundamentals, database queries, web markup, dynamic scripting, and modern version control workflows using Git/GitHub.
